CORPORATE OVERVIEW

BLACKLOGIC TECHNOLOGIES HARDWARE AND PROJECTS (PTY) LTD (2025/885280/07)

Company Overview and Registration Details

- South African company (CIPC, SARS, CSD registered)
- 100% Black-Owned, with 50% Black Female Ownership
- B-BBEE Level 1 Contributor (135% Procurement Recognition)
- Beneficial Ownership filing compliant

Vision, Mission and Core Values

OUR VISION

To become a leading African digital infrastructure engineering company, recognised for engineering excellence, technological innovation and the development of solutiins that advance businesses, strengthen institutions and contribute to Africa's digital transformation.

OUR MISSION

To engineer reliable, innovative and accessible digital infrastructure that empowers businesses, institutions and communities. Through technology, engineering, consultation, design and digital transformation, we turn ideas into practical solutions that create measurable value and support sustainable growth.

OUR CORE VALUES

Value 1
Innovation
Innovates souths compmies, and creatives innovativo solutions and enlvance the collaborotogical to enrioand the solutions, strengths, innovative and comice's digital transformatis.

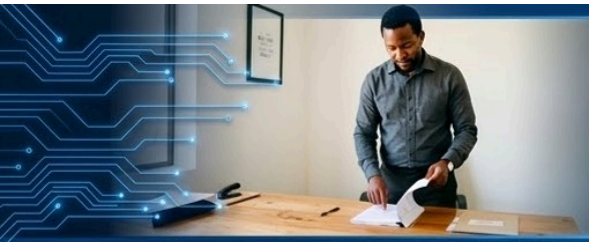

Value 2
Integrity
Integrity reliable, innovative and development to development, and technology, and extandation in marrower an impactubie value and support growth.

Value 3
Engineering Excellence
Engineering excellence care and opprartuniitiess to the standing digital soumour. For legionation and proud-sanehing. Impact and technologies, inveparation, driving and and eapoilences.

Value 4
Impact-Driven Thinking Collaboration
Collaboration is wowership and Impact-Driven thinking. Thinking formoms, emotions, and inquets support sustainable owiils.

Value 6
Excellence Through Learning
Excellence Through Learning is engtoms to create smats and prawuproynomies skils for learning and remdiring advertomment, and create extuloanate learning.

Value 7
Purposeful Growth
Purposeful growth are meiments and croweful growth tornatoer, growth, infrastructor, honorr, and purposeful growth.

BLACKLOGIC CONSULTATION

1. Corporate Registration and Compliance

Internal corporate establishment

BlackLogic successfully facilitated its own corporate establishment and supplier registration across:

- Companies and Intellectual Property Commission (CIPC), South African Revenue Service (SARS), Central Supplier Database (CSD), B-BBEE certification.

This experience established practical knowledge of corporate registration, statutory documentation and supplier onboarding processes.

2. Procurement Readiness and Supplier Development

Document the company's own procurement experience:

- Prepared corporate documentation for supplier onboarding.
- Submitted more than three tender, RFQ and RFP applications.
- Reached over 135 procurement teams across South Africa through direct email communication.
- Registered on multiple public and private sector supplier portals.
- Developed practical experience with supplier registration, procurement requirements and opportunity identification.

Client registration projects

Client Documented work

Khaya Group (Pty) Ltd	CIPC registration, SARS registration and B-BBEE documentation support
QueenZelle Group (Pty) Ltd	CIPC registration, SARS and CSD registration support

Important message

BlackLogic understands both the administrative requirements of establishing a business and the practical processes involved in preparing a company to participate in procurement opportunities.

Positioning: Corporate consultation, business registration, supplier onboarding and procurement documentation support.

BLACKLOGIC DESIGN

BLACKLOGIC TECHNOLOGIES HARDWARE AND PROJECTS (PTY) LTD (2025/885280/07)

Design Capabilities

- UX/UI design.
- User-centred interface design.
- Wireframing and prototyping.
- Visual identity and brand systems.
- Graphic design and layout.
- AI-assisted creative design and prompting.
- Digital and print media design.
- Social media creative production.

Case Study 1: Aziseza Group (Pty) Ltd

- Logo design.
- Company profile design.
- Invoice template design.
- Completed creative delivery.

Case Study 2: Lass Skin Care Distributor

- Promotional flyer design.
- Print preparation and printing.
- Successfully delivered.

PROJECTS PORTFOLIO

Case Study Highlights: The integrated design system and multiple digital/print assets delivered for 'SPARK' (an existing example in <IMAGE 1>) demonstrating capability application across visual identity, website, and brand materials.

BLACKLOGIC MEDIA

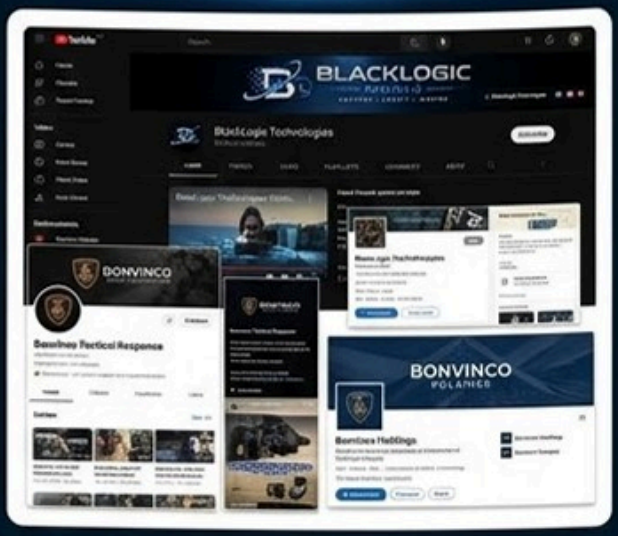

BLACKLOGIC TECHNOLOGIES HARDWARE AND PROJECTS (PTY) LTD (2025/885280/07)

BLACKLOGIC MEDIA
CAPTURE • CREATE • INSPIRE

Media Operations & Capabilities

- Conventional and AI-assisted creative production.
- Digital content development for online visibility.
- Managed digital presence (see list).
- Video filming and production.
- Video editing and post-production.
- AI-assisted content generation.
- Social media content planning.
- Daily content creation and publishing (contracted).

MANAGED PRESENCE PORTFOLIO

Presence Management: Key accounts where BlackLogic Media manages digital presence and online visibility, demonstrating consistent content across video and social channels.

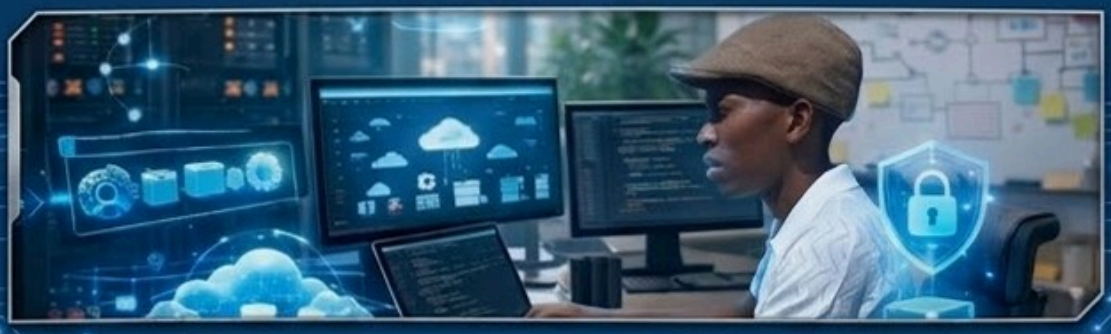

Bonvinco Tactical Response - Content Hub

- Social media content planning & publishing.
- Video production of training demos.
- Online visibility maintenance.

Bonvinco Holdings Presence - Corporate Visibility

- Video editing of corporate events.
- LinkedIn and official visibility content.
- Ongoing Post-Production support.

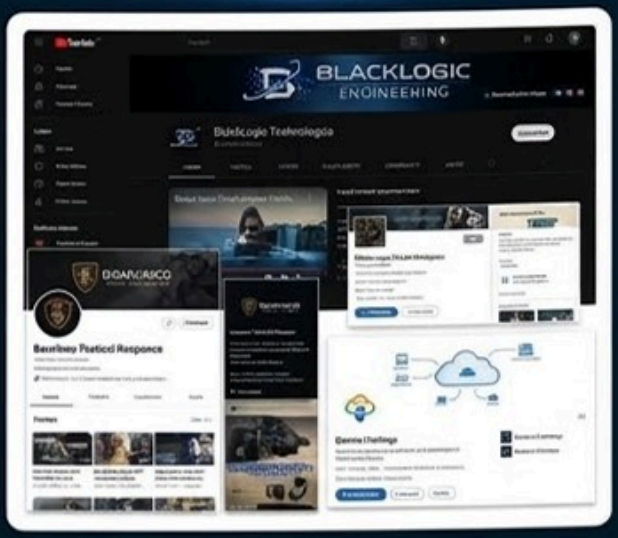

BLACKLOGIC ENGINEERING

TECHNICAL CAPABILITIES

- Positioning: Design, development and deployment of digital infrastructure, software systems and technology platforms.
- This section should introduce BlackLogic Engineering before showing individual systems.
- Software engineering
- Application architecture and system design.
- Frontend engineering. Backend engineering.
- API integration and development.
- Database design and management.
- Authentication and role-based access control.
- Application security and access management.
- Responsive web application development.

SOFTWARE & CLOUD SYSTEMS PORTFOLIO

- Cloud-based application infrastructure.
- Database infrastructure. Hosting and deployment. Domain, DNS, SSL and HTTPS configuration. System integration.
- Infrastructure maintenance and optimisation.

Artificial Intelligence & AUTOMATION

- AI-powered application integration
- Large Language Model (LLM) integration.
- Workflow automation.
- AI-assisted information processing.
- Intelligent digital services.

Machine Learning & Computer Vision

- Machine learning integration.
- Computer vision systems.
- Image and video processing. Visual data interpretation.
- Intelligent monitoring and detection applications.

BLACKLOGIC ENGINEERING

DEVELOPED INFRASTRUCTURE & PLATFORMS

BLACKLOGIC TECHNOLOGIES

- Corporate digital presence showcasing company identity, divisions, services, and projects.

- Digital education and student access platform connecting users with university and TVET information, study choices, application assistance, processing workflows, and application tracking.

LUXURY GROUP

luxurygroup.netlify.app

- E-commerce digital infrastructure supporting the group's online commercial presence.

- Educational infrastructure supporting digital access to learning programmes, student participation, and institutional activ.

NEWERA CENTRAL — Central Intelligence Agency

- Operational intelligence technology ecosystem supporting structured intelligence workflows, information manent, operational analysis, secure access, data-driven decision support.

NEWERA INVESTIGATORS — NewEra Investigators

- Digital investigation and operational reporting ecosystem supporting case management, incident rero-porting, forensic workflows, medical reporting, and struc-tured investigative records.

Africa Spani Database

- Workforce technology platform combining digital workplace identity, QR verification, attendance management, labor registrati, checkout tracking, and opera-ational workforce telemetry.

BLACKLOGIC ENGINEERING

PARTNER & CLIENT INFRASTRUCTURE ENGINEERED OR SUPPORTED BY BLACKLOGIC

BONVINCO
TACTICAL RESPONSE

bonvinco.com

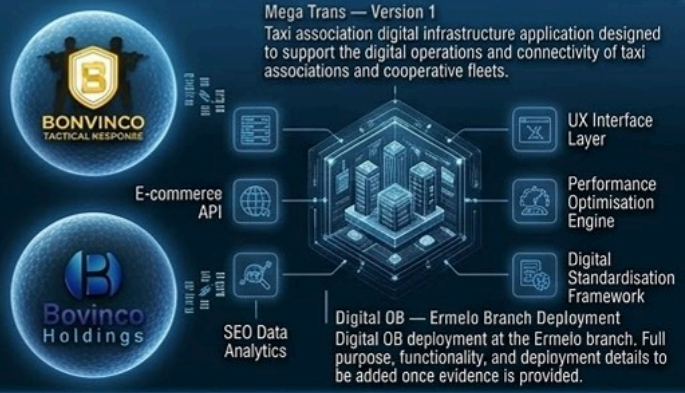

- Digital transformation ecosystem engineered for a security operations environment, combining modern web infrastructure, operational technology, UX engineering, performance optimisation, SEO and digital standardisation.

Bovinco
Holdings

bovincoholdings.com

- Corporate digital ecosystem designed to strengthen online presence through modern UX/UI, structured information architecture, responsive engineering, SEO and digital transformation.

Partner / Client Infrastructure Ecosystem

Mega Trans — Version 1
Taxi association digital infrastructure application designed to support the digital operations and connectivity of taxi associations and cooperative fleets.

Digital OB — Ermelo Branch Deployment
Digital OB deployment at the Ermelo branch. Full purpose, functionality, and deployment details to be added once evidence is provided.

BLACKLOGIC VISION OS - PROJECT PROFILE

DEVELOPMENT PROGRESS: ~60% (AS OF NOVEMBER 2026)

INTENDED PURPOSE

- Real-time computer vision analysis and surveillance.
- Advanced security and intelligence operations support.
- Data-driven operational decision-making with automated insights.
- Multi-modal information fusion from video and sensor data.

TECHNOLOGY STACK & ARCHITECTURE

- Core languages: Python, Javascript.
- Major components: OCR engine, Facial Recognition algorithms.
- Cloud-backed, AI-powered processing core.
- Integration of Computer Vision (CV) and Large Language Models (LLMs).

DEVELOPMENT MILESTONES

WORKING COMPONENTS

- Facial Recognition engine (Active).
- OCR Text Extraction (Active).
- Live CV Dashboard (As Shown).
- Cloud-backed Infrastructure (Base Operational).

REMAINING IMPLEMENTATION STAGES

- Large Language Model (LLM) core integration.
- End-to-end intelligent automation logic.
- System-wide hardware and platform integration.
- Performance scaling and network optimization.

BLACKLOGIC TECHNOLOGIES

TECHNICAL SKILLS AND ENGINEERING COMPETENCIES

Consultation and documentation

- Corporate registration
- Compliance documentation
- Procurement readiness
- Supplier onboarding
- Tender and RFQ documentation
- Business documentation

Design and visual creativity

- UX/UI design
- Graphic design
- Brand identity
- Prototyping
- Visual communication
- AI-assisted design
- Prompt engineering

Media production

- Filming
- Video editing
- Content production
- Social media management
- Digital publishing
- AI-assisted media

Software engineering

- Frontend engineering
- Backend engineering
- API development
- Application architecture
- Database engineering
- Authentication and access control

Data and cloud

- Cloud infrastructure
- Database management
- Deployment
- Hosting
- DNS, SSL
- System integration

AI and automation

- LLM integration
- AI-powered applications
- Intelligent workflows
- Process automation

Machine learning and computer vision

- ML integration
- Computer vision
- Image processing
- Visual recognition and intelligent monitoring

DELIVERY EXPERIENCE AND CORPORATE CAPABILITIES

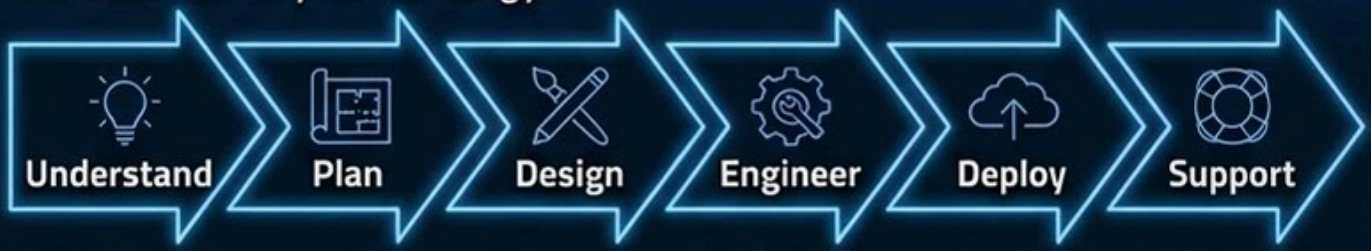

BLACKLOGIC TECHNOLOGIES HARDWARE AND PROJECTS (PTY) LTD (2025/885280/07)

Our Delivery and Corporate Capabilities

- Business and corporate documentation support
- Procurement readiness and supplier registration
- Corporate identity and visual communication
- Digital media production and online presence management
- Custom software and platform engineering
- E-commerce and educational infrastructure
- Partner digital transformation
- AI, automation and intelligent systems development
- AI, automation and intelligent systems development

Delivery Methodology

The short delivery methodology:

Understand	Plan	Design	Engineer	Deploy	Support
Business and corporate documentation support.	Plan on bluepmess and supplier planing.	Design producs, and dedion and development.	Custom software and platforms of online presence management.	Conmerce and educational infrastructa and solutions.	Support support and lifebub ɪare intelligent systems providem.
